Biophysics and Beyond
Vol.1, No.2, 2026
Table of Contents

Khadija Akhundova, Aysu Tinayeva, Rovshan Khalilov (pp.93-110)
CRISPR-Cas9 Genome Editing in Parkinson's Disease: Advances, Applications and Therapeutic Potential

Pusta Zeynalzade, Agil Orujov, Gulnara Azizova (pp.111-124)
Study of the Correlation between Tumor Markers and Selected Biochemical Parameters in Breast Cancer

Shader Alizade, Subhane Quluzade, Ruhangiz Mammadova (pp.125-133)
Nanotechnology-Enabled Cotton Improvement: The Impact of Nanomaterials on Cotton Growth, Stress Resilience and Productivity (A Review)

Sabina Jafarzadeh, Elman Iskender (pp.134-148)
Extremophilic Bacteria as Green Nanofactories Biosynthesis and Biomedical Potential of Iron Oxide Nanoparticles

Farah Mammadova, Maryam Aliyeva, Fatima Abasova, Arzu Dadashova, Gulnara Azizova, Rovshan Khalilov (pp.149-161)
Apoptosis or Endothelial Dysfunction? The Search for the Dominant Pathogenetic Pathway in Ischemic Heart Disease and the Dominance Index

Begüm Savaşan Asgarli (pp.162-171)
Fingernail-Mounted Photoplethysmography and Machine Learning for Vital-Sign Monitoring in Post-Conflict Karabakh

Ismat Ahmadov, Rovshan Khalilov (pp.172-178)
The Effect of Stress Factors on the Activity of the Proton Pump in the Plasma Membrane of Plant Cells
